

## Editorial

This issue of *Mapana – Journal of Sciences* is devoted to research articles from Physical Sciences. Researchers from various universities have contributed to the present issue. The first article is on ‘Characterization and electrical conductivity of electron beam irradiated metal phthalocyanine complexes’. The second article is on ‘Electronic-Ionic conductivity of lithium-vanado- phosphate glasses’. The two subsequent articles are related to atmospheric science. The first one deals with the ‘Study of atmospheric instabilities through radioactivity’ while the second one is on ‘Climate change analysis using satellite data’. The last article is on the ‘Experimental studies of UV irradiation induced changes in optical, mechanical and microstructural properties of PVA/modified cellulose composite’.

All the articles were peer reviewed by experts in the respective fields and accepted for publication after incorporation of the suggestions made by the experts. We thank all the authors for their valuable contributions. We also take this opportunity to thank all the reviewers for spending their precious time in reviewing the articles and giving valuable suggestions. We expect the cooperation and expert guidance of all the researchers for further improvement of the quality of the Journal in the coming years. We have been continually striving to meet the global standards for journal publication.
