

Editorial

This issue of *Mapana – Journal of Sciences* is devoted to research articles from Physical Sciences. Researchers from various universities and Research organizations have contributed to the present issue. The first article is on ‘Study of role of silver nanoparticles on spectroscopic properties of a ketocyanine dye’ by J Thipperudrappa et al. The second article is on ‘Optical properties of Erbium doped Molybdenum Tellurite glasses’ by B Eraiah. The third article is on ‘Study of electron transfer between amines and biologically active 4 -aryloxymethylcoumarin’ by U P Raghavendra et al. The last article is by Kamsali Nagaraj et al., which deals with the ‘Analysis of short and long wave radiation over Bengaluru’.

All the articles were peer reviewed by experts in the respective fields and accepted for publication after incorporation of the suggestions made by the experts. We thank all the authors for their valuable contributions. We also take this opportunity to thank all the reviewers for spending their precious time in reviewing the articles and giving valuable suggestions. We expect the cooperation and expert guidance of all the researchers for further improvement of the quality of our Journal in the coming years. We have been continually striving to meet the global standards for journal publication.
