

CONTENTS

Editorial

Research Articles

- Low Temperature Fluorination of Superconducting and Non-superconducting Compounds Using NH_4F 1
George Thomas
- Synthesis and Characterisation of Phthalic Acid Complexes with Biologically Active Metal Ions 7
S. Peter and M.S. Selvakumar
- Weak and Strong Bitopological Lindelof Space 12
K.A Venkatesh and S. Balasubramanian

Research Account

- Application of Ruscheweyh Derivative Operator on Meromorphic Functions in the Unit Disk 15
K.S. Padmanabhan and Rajalakshmi Rajagopal
- Some Features of Java Language Illustrated through Examples from Chemistry 22
K.V. Raman

Research Project

- Immunization of Children 57
Y. Udaya Bhaskara Rao

Review Articles

Rational Unified Process Part - II Best Practices for Software Development Team <i>Manoj Tharian</i>	69
--	----

General Articles

Filtration – Understanding Techniques, Types of Filters and Blocking of Filters <i>M.S. Mahadevan and Ivy Louis</i>	82
Spectroscopic Measurements as Scientific Tool <i>O.C. Muralidhara</i>	87

Profile
